FORMATION OF THE TENSES.

THE tenses are divided into primitive and derivative. The primitive tenses are those from which the derivative are formed.

There are five primitive tenses, which are: *the present of the infinitive, the present participle, the past participle, the present of the indicative, and the preterite definite.* The present of the infinitive forms two tenses. 1st. The future by changing *r, oir, re* into *rai, ras, ra, rous, rez, ront*; as, *parler, je parlerai; finir, tu finiras; recevoir, il recevra; rendre, nous rendrons*, etc. 2d. It forms the conditional by changing *r, oir, re* into *rais, rais, rait, rions, riez, raient*; as, *étudier, j'étudierais; bâtir, il bâtirait; devoir, vous devriez; apprendre, ils apprendraient.*

The present participle forms three tenses. 1st. The three persons plural of the indicative present, by changing *ant* into *ons, ez, ent*; as, *parlant, nous parlons, vous parlez, ils parlent.* Except the third person plural of the third conjugation, where *evant* is changed into *oivent*; as, *recevant, ils reçoivent.* 2d. It forms the imperfect of the indicative, by changing *ant* into *ais, ais, ait, ions, iez, aient*; as, *punissant, je punissais, tu punissais*, etc. 3d. It forms the present of the subjunctive, by changing *ant* into *e, es, e, ions, iez, ent*; as, *vendant, que je vende, que tu vendes*, etc. Except the third conjugation, where *evant* is changed into *oive, oives, oive, oivent.*

The past participle forms all the compound tenses by prefixing the auxiliary *avoir* or *être*; as, *j'ai parlé; il est allé; elle a fini; nous étions venus, vous aurez fini, ils seraient arrivés*, etc.

The present of the indicative forms the imperative by suppressing the personal pronouns, *tu, nous, vous*, and by dropping the *s* in the second person singular of the first conjugation; as, *tu parles, parle; nous finissons, finissons; vous recevez, recevez; vous vendez, vendez.*

The preterite definite forms the imperfect of the subjunctive by adding *se* to the second person singular, as: *tu parlas, que je parlasse, que tu parlasses, qu'il parlât, que nous parlussions, que vous parlassiez, qu'ils parlassent; tu finis, que je finisse, que tu finisses, qu'il finît, que nous finissions, que vous finissiez, qu'ils finissent; tu reçus, que je reçusse, que tu reçusses, qu'il reçût, que nous reçussions, que vous reçussiez, qu'ils reçussent; tu vendis, que je vendisse, que tu vendisses, qu'il vendît, que nous vendissions, que vous vendissiez, qu'ils vendissent.*

ein.		vain,	vaing.	en.	à jeun,	ah-jieung.	
ein.		riches,	richesse.	The final, derived from Latin words, is sounded <i>om</i> .			
im.	}	sein,	saiing.	No, preceded by <i>i</i> or <i>y</i> ; also in proper names, is pronounced <i>eug</i> or <i>aing</i> .			
in.		impit,	aiing-poe.				
		index,	aiing-decks.				

OBSERVATIONS.

1. *G* is placed after every nasal syllable to prevent the sharp sound of *m* or *n*.
2. *H* preceding *j* or *g*, destroys the sound of *d*, combined with the English articulation of these two consonants.
3. *Gh* followed by *y*, represents exactly the nasal liquid syllables, which have no equivalent simple sound in English, by transposing in pronunciation the *n*, and *i*, after *g*, as:

<i>ing-yah,</i>	<i>gna.</i>	<i>ing-ye,</i>	<i>gni.</i>
<i>ing-yai,</i>	<i>gni.</i>	<i>ing-yo,</i>	<i>gni.</i>
<i>ing-yah,</i>	<i>gni.</i>	<i>ing-yu,</i>	<i>gni.</i>
4. *H*, placed after a vowel, affixes to that vowel its primitive short sound.
5. *Ghe*, lengthens the pronunciation of the final nasal syllables.
6. *Yah*, represents the liquid sound of *l* or *ll*, pronounced very short.
7. *S*, *x*, *c*, at the end of words, open an *i* lengthen the final syllable.

OBSERVATIONS.

A letter, or syllable, such as *e*, *se*, *le*, *re*, following an adjective or participle, shows it is feminine.

The infinitive of the first conjugation always ends in *er*; the second, in *ir*; the third, in *oir*; and the fourth, in *re*.

The infinitive only is given, in this dictionary, when the verb is regular.

When a tense of an irregular verb is conjugated like the same tense of the regular conjugation to which it belongs, it is omitted in the dictionary. Derivative tenses formed regularly are also omitted.

FRENCH.

Being aware of the objections, often too well founded, against American editions of French books, on account of their inaccuracies, we have taken particular pains in the printing of the following series; and we do not hesitate to affirm, that in regard to correctness of Typography, and the quality of the Paper and Binding, they are not surpassed by any similar works, whether published in this country or in France.

Manesca's Oral System of Teaching French.

1 v. 8vo. \$3.

The chief feature of this new system is, that it seeks to introduce the learner of a language to its vocabulary by the same process which children follow: by leading him from the simplest elements—the expressions and phrases needed in our earliest experience—gradually up to the philosophy of the language. The beginning is made, therefore, not with grammar and the philosophic structure of the language, but with its simple words and sentences.

“The system for teaching languages discovered by Jean Manesca is the *system of nature*; it is the result of twenty years' study and observation of a superior mind. In speaking of this admirable method, I do not speak at random, and without knowledge; I have studied several languages upon the system—the French, the Spanish, Italian, German,

and Latin. I have examined the various methods employed in Europe, and, from my own observation, I consider Manesca's system infinitely superior to all the various methods which have been put forth by persons seeking to abridge the labor of learning languages. In fact, it is the only method that I have yet seen that deserves the name of **SYSTEM**—for it is a **WHOLE**, complete in all its parts, based upon the laws and principles which nature employs in teaching language to the young mind, but embracing all the parts of language, and only modifying nature's method, so far as to adapt it to mature age, or to the mind that can reason, and bring the aid of reflection and thought to bear in the study of language; whereas the child brings only instinct. * * * It commences by giving to the scholar some of the simplest elements of language, which he learns quickly and easily to use, physically and mentally, as well as those of his own language. When this is done, new elements—that is, new words and ideas—are added, which are incorporated in a natural way with those already known, and used with them until an equally perfect knowledge of them is obtained. New elements are progressively added at each lesson, until the whole language is learned. With twenty years' experience, Manesca *methodized language*; he distributed all the elements in the manner the student should learn them, and his system teaches him *to read, to write, and to speak* at the same time."

"This is a new edition of a work which has already acquired a reputation so extended, that few can be unacquainted with its excellence over all others for the acquisition of the French language. Until this work appeared, a few years since, little had been done to advance the *science* of teaching foreign languages. Those who were intrusted with this branch of education generally followed a routine handed down to them by their predecessors—a routine in which it was often required that words, sentences, and abstract rules should be committed to memory, without presenting to the pupil *an opportunity for their use and application*. Many intelligent teachers no doubt felt the inefficiency of such a method, but it appears to have been reserved for Manesca to find out a new path which should lead to certain and successful results, and at the same time immeasurably relieve the scholar. A striking peculiarity of this system, and by which it pre-eminently excels all others that have ever come within our notice, is the importance it attaches to the *spoken* language, and the facility it presents to the scholar for the acquisition of this most important part of his pursuit.

Manesca's Philological Recorder, adapted to "Manesca's Oral System of Teaching the Living Languages." 4to. 75 cts.

Meadows' French and English Pronouncing Dictionary

16mo. \$1.25.

This work is based on the well-known Dictionary of NUGENT, with many new words in general use, in Two Parts: 1. French and English; 2. English and French. Exhibiting, *The Pronunciation of the French in pure English sounds*—The Parts of Speech—Gender of French Nouns—Regular and Irregular Conjugations of Verbs—Accent of English Words—List of the usual Christian and Proper Names, and Names of Countries and Nations. To which are prefixed, Principles of French Pronunciation, and an abridged Grammar. By F. C. MEADOWS, M. A. of the University of Paris. New edition, revised and improved by CHARLES L. PARMENTIER, M. A., Professor of the French Language and Literature.

"The edition of 'MEADOWS' FRENCH DICTIONARY' which is now submitted to the public, has been considerably improved. It contains a list of Proper Names in most ordinary use, together with the names of Gods, Goddesses, Kings, Heroes, &c., which are often met with in works of Poetry, Mythology, and History, and *which are not spelled the same in English as in French*.

"It is needless to speak at length of the merits of this work. Its numerous editions in America as well as in Europe, prove that it is the most popular French and English Dictionary extant.

"The efforts of the subscriber have been mainly devoted to extending the usefulness of the work, by making such additions to the labors of his predecessors, as seemed necessary to render it at the same time a complete manual for the beginner, and, from its great copiousness, a valuable assistant to the investigations of the man of letters. He trusts that his contributions to this end will not prove altogether profitless to the cause of education."—*Preface by PROFESSOR PARMENTIER.*

Nouvelle Grammaire française, par Noël et Chapsal.

12mo. \$1.00.

NOUVELLE GRAMMAIRE FRANÇAISE, sur un plan très-méthodique, avec de NOMBREUX EXERCICES d'Orthographe, de Syntaxe, et de Ponctuation, tirés de nos meilleurs auteurs, et distribués dans l'ordre des règles; par M. NOËL, Inspecteur-Général de l'Université, Chevalier de la Légion d'Honneur, et M. CHAPSAL, Professeur de Grammaire générale. Ouvrage mis au rang des livres classiques, adopté pour les Ecoles primaires supérieures et pour les Écoles militaires. Nouvelle édition, revue et augmentée.

The reputation of this popular Grammar is so well known, that to praise it would be superfluous. The present is an EXACT REPRINT OF THE LAST PARIS EDITION, and every effort has been taken to avoid those inaccuracies so often incident to American editions of French books.

A revised and improved edition, enriched with Biographical and Critical Notes, and with Selections from *Writers of the present time.*

Le Siège de la Rochelle, par Mme. de Genlis. 12mo. \$1.

"We have read with great pleasure 'Le Siège de la Rochelle,' and recommend it as one of the best books for translation there is publish-

ed. It is considered one of the most popular of Mme. de Genlis' works, whose name is well known in French literature. The narrative is intensely interesting, and will command attention to the close. Though a work of fiction, the incidents are partly founded on fact: the historical scenes and characters are correctly drawn, and present a fair view of this most eventful period of French history.

"Containing none but just and moral sentiments, it is admirably adapted to be used as a School Reader, and we trust that it will meet with the favor it deserves."

Le Vicaire de Wakefield, par Goldsmith. 12mo. 75 cts.

In translating this beautiful English Classic into French, special care has been taken to preserve the beauty and simplicity of the style; and we trust that the present effort to render it a School Reading Book will meet with favor.

Œuvres Complètes de Molière. 2 v. 12mo. 1334 pp. \$2.00

This edition contains all the works of this great author, and is beautifully printed, on fine paper.

Œuvres Choies de Molière: contenant La Bourgeois Gentilhomme, Le Misanthrope, et Les Femmes Savantes. 18mo. 63 c.

The editor has carefully revised the text, and has faithfully followed the most approved Paris editions. As to the Comedies selected, though many others of the same writer are at least equal, if not superior, in merit, it must be remembered that this is a Molière *intended for schools and for the use of young persons*, and the selection has been made in reference to that object.

Œuvres Complètes de J. Racine: contenant, La Thébaïde, ou Les Frères ennemis—Alexandre—Andromaque—Les Plaideurs—Britannicus—Bérénice—Bajazet—Mithridate—Iphigénie—Phèdre—Esther—Athalie. Édition annotée d'après Racine fils, Madame de Sévigné, Le Batteux, Voltaire, La Harpe, Napoléon, Schleyel, Roger, Geoffroi, Patin, Sainte-Beuve, Saint-Marc Girardin, Nisard, etc. 12mo. 760 pp. \$1.

AVIS SUR CETTE ÉDITION.

Parmi les grands écrivains qui honorent notre littérature, il en est peu dont les œuvres aient été aussi fréquemment reproduites que celles de Racine. Les grammairiens, les critiques et les commentateurs littéraires, ont depuis deux siècles étudié ses compositions scéniques pour y chercher les uns des modèles de style, les autres le modèle de l'art et du

goût, et les nombreux travaux dont ce poète à jamais célèbre a été l'objet, nous imposaient de grandes obligations; aussi nous sommes-nous efforcé de rendre irréprochable l'édition que nous publions aujourd'hui.

Nous avons donné d'abord toutes les préfaces, parce qu'elles forment l'indispensable introduction des pièces; qu'elles en contiennent souvent l'analyse et l'examen, et que Racine y développe avec la supériorité de son génie ses théories esthétiques.

Nous avons aussi reproduit toutes les variantes, parce qu'on voit là les premiers essais du poète, le travail de son goût dans le choix des mots, et son constant effort pour approcher autant que possible de la perfection. * * * Comme toujours, nous avons fait prédominer le commentaire moral et psychologique, et en rapportant à l'occasion le jugement des contemporains du poète, à partir du grand Condé et de madame de Sévigné, nous avons suivi, en ce qu'ils ont de plus saillant, les travaux des critiques et des historiens littéraires, depuis Racine fils, jusqu'à messieurs Sainte-Beuve, Nisard et Saint-Marc Girardin. On a de la sorte, dans le blâme et dans l'éloge, l'écho fidèle de l'opinion dans un espace de près de deux siècles.

Ainsi, notre édition offre, jusque dans les moindres variantes et les moindres fragments, tout ce que Racine a écrit pour le théâtre, et sous une forme concise tout ce que l'histoire littéraire a dit de plus essentiel sur ce théâtre lui-même.

Œuvres Choies de Jean Racine: contenant *Bajazet*, *Andromaque*, *Iphigénie* et *Esther*. 18mo. 63 cts.

It has long been desirable that the works of this great poet should be used in our schools as a reading-book; but as his writings are too voluminous for that purpose, a proper selection of his best pieces has been made. This selection the editor trusts will prove acceptable to all instructors and professors of the French language, as well as to all interested in French literature.

It is printed with great accuracy, thus removing the usual objection to the editions of French works published in this country.

De l'Allemagne, par Mme. De Staël. 12mo. 638 pp. \$1.

This has been considered the most popular of Mme. De Staël's works, and has always sustained a high literary reputation.

Presenting an interesting and truthful Description of Germany—the Manners and Customs of the Germans—their Literature, Arts, and Sciences—Views of Philosophy, Morals, and Religion—and thus combining instruction with the study of the language, it is pre-eminently adapted for an advanced class-book.

Aventures de Gil Blas de Santillane, par Le Sage
12mo. \$1.

It has for some time been a matter of doubt whether the "*Adventures of Gil Blas*" was the work of a Spanish or French writer; but we believe it is now generally conceded to be the production of the latter.

Although not free from objections for indiscriminate use, yet it has always been considered a desirable book for translation, from the fact that, consisting as it does of a series of narratives abounding in colloquial expressions, and being connected very indirectly, the reader is not wearied as he would be by a lengthy story, the interest continuing as the scene changes.

Fables de La Fontaine. 100 engravings. 18mo. 63 cts.

La Fontaine's beautiful Fables are known to every French scholar, and are admirably adapted to be used as a book for translation.

Each fable is followed by its appropriate moral; and thus just principles, in a pleasing manner, are inculcated into the mind of the reader while engaged in his study.

Atala, René, par Chateaubriand. 12mo. 50 cts.

The beauty of Chateaubriand's writings has established for him a high literary reputation.

This little work has always been considered the most popular of his minor productions, and was originally a part of the "*Génie du Christianisme*," although latterly it has been generally published in a separate form.

It was written, as the author says, "in the wilds of America, and under the tents of the savages," and the incident on which the story is founded is mentioned in his "*Voyages en Amérique*."

It is printed from the author's last edition, and in a large clear type, and the Publishers hope that it will meet with favor as a Reading Book for school use.

Paul et Virginie, par Bernardin de Saint-Pierre. 50 cts.

"This most delightful work is too favorably known to require any recommendation from us. The beauty and simplicity of the style, together with the interest of the story, have always rendered it a favorite with young persons. We trust that the present edition, intended for schools, will meet with general acceptance."

The same work, with a Full and Correct Vocabulary of all the Words and Idiomatic Expressions contained in the book; also Interlinear Translations, both free and literal, of the first few pages, with the Pronunciation of the French indicated by English sounds. 12mo. 6½ cts.

Elisabeth, ou Les Exilés de Sibérie, par Mme. Cottin
12mo. 50 cts.

"The incident which gave rise to this history is founded in truth. No imagination, however fertile, could produce actions so heroic, or sentiments so noble and elevated. The heart alone could inspire them. * * Authors have frequently been accused of representing the beauties of virtue with too bold a pencil, and in colors too vivid. Far am I, however, from presuming to insinuate that this criticism is applicable to myself, who possess not the abilities requisite to attain this brilliant though creative talent; nor do I conceive that it is in the power of the most eloquent author, by all the studied embellishments and decorations of language, to add a single charm to the innate beauties of virtue. On the contrary, she is in herself so far superior to the adscititious aids of ornament, that it would rather appear impossible to describe her in all her native dignity and loveliness. This is the chief difficulty I have experienced in writing ELISABETH."—*Translation of extract from Author's preface.*

The same work, with a Full and Correct Vocabulary of all the Words and Idiomatic Expressions contained in the book; also Interlinear Translations, both free and literal, of the first few pages, with the Pronunciation of the French indicated by English sounds. 12mo. 63 cts.

Conversational Phrases Classified, or French Synonimes, by J. L. Mabire. 16mo. 45 cts.

Most of the Guides to French Conversation heretofore published in this country have been merely collections of certain conversations on specified subjects, which, unless they were again to recur in the precise form of the lesson, would be of but little assistance to the student. In other words, he but stores his mind with set formal phrases for specific occasions, without an acquaintance with the genius and power of the language, or the ability to adapt his knowledge to the peculiar and varied circumstances of every-day life.

This work is arranged ON AN ENTIRELY NEW PLAN. It consists of the most familiar phrases of every-day conversation, classified according to their sense under various appropriate heads, such as the following:

- | | |
|--|---|
| 1. To tire, weary, grow tired. | 11. To design, draw, sketch, paint. |
| 2. To affirm, assure, warrant, attest. | 12. To pray, beseech, ask, entreat. |
| 3. To obey, yield, submit. | 13. To approve, consent, permit, tolerate. |
| 4. To imagine, believe, persuade one's self. | 14. To lodge, live, dwell, remove. |
| 5. To admire, astonish, surprise. | 15. To raise, lift, open, shut. |
| 6. To depart, set out, travel, ride. | 16. To rail, slander, insult, injure. |
| 7. To light, kindle, blow, extinguish. | 17. To commend, praise, flatter, compliment. |
| 8. To warm, cool, dry, wet. | 18. To blame, reprimand, criticise. |
| 9. To laugh, smile, weep, joke. | 19. To place, put, set, lay, arrange. |
| 10. To dance, salute, greet, bow. | 20. To condemn, despise, depreciate, disdain. |

With an Alphabetical Index.

It is divided into 236 similar heads, besides containing Models of Notes, Invitations, Letters, the most Difficult and Common English Idioms, &c.

It has acquired an extraordinary popularity in England, having, in a few years passed through many editions, *numbering over 100,000 copies.*

Le Livre des Petits Enfants, avec Vocabulaire. 50 cts

This little volume of Easy Tales was published in France for the use of Young Children who had just learned to read. The design of the authoress was, by a series of entertaining narratives, to allure the Young onward in the path of learning, and at the same time to imbue their minds with sentiments of religion and virtue, and of love for the Sacred Scriptures.

To the carefully printed text is added a literal English translation of the first ten stories, and a full vocabulary to the remaining ones.

These facilities, together with the simple style of the stories themselves, render this book one of the easiest for translation.

Mrs. Barbauld's Lessons for Children, in French, with a Vocabulary. 16mo. 45 cts.

To attempt a eulogy of "Mrs. Barbauld's Lessons for Children" would be superfluous. We only remark that, on account of its extreme simplicity, no book is better suited for young persons commencing the study of French.

It is translated with great care, and is beautifully printed on a large clear type, with illustrations.

"The task is humble, but not mean; for to lay the first stone of a noble building, and to plant the first idea of a beautiful language in a human mind, can be no dishonor to any hand."—*Mrs. B.'s Preface.*

First Lessons in Learning French, by Prof. Gustave Chouquet. 16mo. 45 cts.

This work is intended for pupils commencing the study of the French language. In such a work it is not necessary that the rules of grammar should be *formally introduced*; they serve rather to weary and embarrass than to profit.

In design and execution it is so simple as to be within the reach of any child, however young, who is capable of reading in English. The present edition is much enlarged and improved, and printed on very large type. It is divided into six parts, as follows, viz.:

PART I. Spelling Lessons, designed also for Exercises in Pronunciation.

PART II. Simple and Progressive Lessons in Grammar and Translation.

PART III. A Vocabulary of the most Common and Familiar Objects, together with appropriate Exercises in Phrases and Short Sentences; the whole divided into lessons, each embracing a distinct Subject.

PART IV. Examples of French Verbs, auxiliary, regular and reflective, fully conjugated.

PART V. A few simple Stories, the first few followed by a Translation of the more difficult Words and Idioms.

PART VI. A collection of simple and familiar Conversational Phrases, divided into short and easy lessons.

French Spelling and Pronunciation, by H. Vannier. 45 cts

After a careful examination of the most recent and approved elementary Spelling-Books published in France, we have selected the system of H. Vannier, as being the simplest and yet the most methodical.

It is divided as follows :

PART I. Exercises on all the Sounds and possible Combinations of Articulations and Words.

PART II. Spelling Lessons, or a Vocabulary of the most useful Nouns in the French Language, systematically arranged under distinct heads.

PART III. Examples of French Verbs—auxiliary, regular, and reflective—fully conjugated.

Del Mar's Guide to Spanish and English Conversation, containing various lists of Words in most general use, properly classified; collections of Complimentary Dialogues and Conversational Phrases on the most general subjects of life; Proverbs and Idioms; also comparative Tables of Coins, Weights, and Measures. 12mo. 75 cts.

In this new edition the Proverbs and Idioms, as well as the Dialogues, have been considerably enlarged; the New Orthography has been introduced, according to the last decision of the Spanish Royal Academy; and a Treatise on Spanish Pronunciation has been prefixed.

These additions will further advance the utility of the work, and render it still more worthy of public favor.

(*Prólogo de Urcullu de la Edicion de Cadiz.*)

ALGUNAS PALABRAS SOBRE ESTA NUEVA EDICION.

La buena acogida que ha tenido mi gramática en los veinte años que han pasado desde que la dí á luz, cuando estuve emigrado en Lóndres, me ha movido á publicar una nueva edicion de la misma. En la primera dividí la gramática en XXII lecciones. Muchas de las ediciones

que se han hecho tanto en aquella capital como en otros países desde 1825 hasta ahora, han sido copias de la primera.

En 1840, estando yo en Oporto, se imprimió allí una edicion en XXV lecciones, en la cual hice alteraciones de bastante consideracion; pero pocos son los ejemplares que han penetrado en España. Por consiguiente para satisfacer los deseos de muchos profesores de la lengua inglesa, era necesario que se imprimiese en España mi gramática; mas no como se ha hecho ántes de ahora en Barcelona, sin mi intervencion, y copiando los defectos de la que se publicó en Lóndres.

La presente edicion, dividida en XXVII lecciones, es superior á cuantas se han publicado hasta este dia, no solamente por las correcciones que se han hecho, como por las materias que se han aumentado. Explicaré esto brevemente.

Cada una de las lecciones XIV, XV, XVIII y XXII se han subdividido en dos, para que el discípulo pueda aprenderlas mas fácilmente siendo mas cortas. He suprimido las lecciones XXIV y XXV, porque lo que ellas contenian no pertenecia, estrictamente hablando, á la parte gramatical; pero el discípulo lo hallará, con notable aumento al fin del libro en la lista alfabetica de las particulas inglesas.

En los modelos de traduccion, he introducido algunas máximas de buenos autores ingleses.

Las poesías inglesas que puse en la edicion hecha en Oporto, han sido traducidas por mí al castellano. El Herald ode Madrid publicó una de ellas el año pasado, y un periódico de Cadiz la otra este año. He aumentado una poesía inglesa, no como modelo, sino para que el discípulo se ejercite en la traduccion de los numerosos verbos que ella contiene.

La parte tercera de la obra, que no tienen las ediciones anteriores, se compone: 1º. de una lista alfabética de las principales partículas inglesas y su uso en dicha lengua, que ántes formaba el asunto de las dos últimas lecciones, como ya se ha mencionado. 2º. De una explicacion de muchas palabras y abreviaturas latinas muy usadas en los periódicos ingleses, y algunas voces francesas, que forman parte de la lengua inglesa. 3º. De varios documentos de comercio útiles para los que piensen dedicarse á la carrera mercantil. 4º. Finalmente, de una lista de abreviaturas inglesas, que tambien puedo asegurar es la mas completa que hasta ahora se ha publicado en España. Lo primero y cuarto ha recibido un aumento considerable; lo segundo y tercero es enteramente nuevo.

En la parte gramatical he hecho correcciones y alteraciones que solo pueden notarse cotejando esta edicion con otras anteriores.

Si el público ha recibido ántes de ahora favorablemente mi gramática, debo suponer sin ninguna clase de presuncion que todavía ha de merecer mas su aprobacion la que hoy le ofrezco; y que ya no se podrá decir

con razon en lo adelante que era necesario valerse de gramáticas escritas en frances para aprender la lengua inglesa.

Es muy probable que esta sea la última edicion que yo publique, y mas si, como presumo, los lazos de familia me obligan á dejar la hermosa España para establecerme nuevamente en el reino vecino, que por la larga serie de años que en él he pasado y por los vínculos que á él me unen considero como á una segunda patria.

ADVERTENCIA.

Al reimprimir por primera vez en América la última edicion de la nueva Gramática de Don José de Urcullu, publicada en Cadiz por el mismo autor con las considerables mejoras que esplica en su Prologo, hemos hecho todo lo que ha estado á nuestro alcance para mejorar la obra, lo que creemos haber conseguido por los medios siguientes:

1º. Arreglando la conjugacion de los verbos, segun las mejores gramáticas inglesas, añadiendole por consiguiente el modo Potencial, desconocido en nuestra conjugacion, por cuya razon la mayor parte de los gramáticos lo han confundido con nuestro Subjuntivo, que es á todas luces distinto en su uso y aplicacion, despojando así á la conjugacion inglesa de la inmensa ventaja que en precision y enerjia le dan sus auxiliares.

2º. Ampliando la leccion sobre los verbos auxiliares, la del uso del futuro, la del subjuntivo y la de las preposiciones, y redactando entera la del imperativo.

3º. Añadiendo las notas que se han estimado necesarias, y aun refutando las opiniones del autor cuando se han creido erradas.

4º. Dando reglas para la division de las sílabas.

5º. Enriqueciendo la lista de las abreviaturas inglesas, é igualmente la de las eliciones.

6º. Añadiendo un Tratado de la Propiedad de aquellas voces que, teniendo en español varias acepciones, se espresa en inglés cada acepcion, con diferente palabra.

7º. Agregando un Lector y Traductor inglés bajo un plan enteramente nuevo, concluyendo con una serie de cartas para llevar una correspondencia mercantil.

8º. Finalmente, publicando una CLAVE DE LOS TEMAS que se hallará al fin de la obra, para que el discípulo compare con ella la traduccion que haga de los que se dan en la Gramática. La ventaja de este Clave, sur para los que estudien con maestro, es demasiado obvia para que nos detengamos en recomendarla.

Si á todas las mejoras mencionadas se añaden las hechas por el mismo autor, segun lo esplica en el Prólogo siguiente, fácil será penetrarse de las inmensas mejoras de esta edicion sobre todas las anteriores.

Robertson. Nuevo Curso practico, analitico, teorico y sintetico de Idioma Inglés; escrito para los Franceses por T. Robertson obra aprobada por la Universidad de Paris; traducida y adaptada al castellano sobre la última edicion del original por PEDRO JOSE ROJAS. 8vo. \$3.00.

“La Academia Real de Buenos Letras de la Isla de Puerto Rico, despues de haber oído á su Comision de Instruccion pública acerca del Nuevo Curso de Inglés por Robertson, adaptado al Castellano por Don P. J. Rojas, y considerando que dicha obra renne á su claridad, precision y correcto language, una gran facilidad para la adquisicion del idioma inglés, y un método admirable para la pronunciacion de las palabras, ha ordenado que dicha obra se tenga por único texto en las escuelas y colegios, de la Isla.—Puerto Rico, febrero 10 de 1852.—El Capitan General, Pezuela.”

“La Direccion General de Estudios de la República de Venezuela, habiendo examinado cuidadosamente el Nuevo Curso de Inglés por Robertson, adaptado al Castellano por el Señor P. J. Rojas, y considerandolo sumamente útil y eficaz para la enseñanza de aquel idioma, ha acordado se incluya dicha obra en el catálogo de textos para los Colegios y escuelas nacionales.—Caracas 4 de Junio de 1851.—Por la Direccion, J. Vargas, Presidente.”

The Royal Academy of the Island of Porto Rico, after hearing the Committee of Public Instruction in regard to the New Course of the English Language by Robertson, translated into Spanish by Mr. P. J. Rojas, and considering that said work combines with clearness, precision, and a correct style, a great and wonderful facility for acquiring so difficult a language as the English, and that it contains likewise an admirable method of English pronunciation, has in its last session ordered this work to be used as the only English text-book in all the schools of the Island.—Porto Rico, February 10th, 1851.—J. de la Pezuela, Captain General.”

“The General Direction of Studies in the Republic of Venezuela, having carefully examined the New Course of the English Language, published in France, by Robertson, and translated into Spanish by P. J. Rojas, Esq., and considering it highly useful and efficient in teaching that language, has ordered it to be adopted as a text-book in all the National Schools.—Caracas, June 4th, 1852.—By the Direction, J. Vargas, President.”

Emanuel del Mar. Guia para la Conversacion en español é inglés, que contiene varias listas de las Voces mas usuales, debidamente classificadas; Colecciones de Diálogos de Etiqueta y Frases de Conversacion sobre los asuntos mas generales de la vida; Refranes y modos de decir; y Tablas comparativas y Monedas, Pesos, y Medidas. 12mo. 75 cts.

NUEVA EDICION, cuidadosamente revisada y perfeccionada, y aumentada con muchas cosas útiles que ha juzgado podrian ensalzar la utilidad de la obra, y hacerla todavía mas digna de la aceptacion pública.

Los proverbios, Refranes, y Modos de Decir, como tambien los Diálogos, han sido considerablemente extendidos, por razon de su mucha utilidad al estudiante, tanto en la conversacion como en la lectura, y se ha tenido cuidado en reunir los que fuesen de uso mas continuo en ámbos idiomas.

A esta edicion tambien se le ha agregado un TRATADO DE PRONUNCIACION INGLESA, etc.

(TRANSLATION): *Del Mar's Guide to Spanish and English Conversation, containing various lists of Words in most general use, properly classified; collections of Complimentary Dialogues and Conversational Phrases on the most general subjects of life; Proverbs and Idioms; also comparative Tables of Coins, Weights, and Measures.* 12mo. 75 cts.

NEW EDITION, carefully revised, improved, and enlarged by many useful additions, which might further advance the utility of the work and render it still more worthy of public favor.

The PROVERBS AND IDIOMS, as well as the DIALOGUES, have been considerably enlarged, on account of their great use to the student, both in conversation and in reading; and particular care has been taken in selecting those idiomatic expressions which are most common to both languages.

To this edition has been appended a Treatise on ENGLISH PRONUNCIATION.

The following Books, by Miss ELIZA ROBBINS, are intended not merely to teach reading for reading's sake, but to suggest an intelligent method of instruction, in preference to one merely mechanical.

Introduction to American Popular Lessons.	1 v. 18mo. 25 <i>cts.</i>
American Popular Lessons.	1 v. 18mo. 31 <i>cts.</i>
Sequel to Popular Lessons.	1 v. 18mo. 50 <i>cts.</i>
Primary Dictionary.	1 v. 18mo. 31 <i>cts.</i>

The following notice, voluntarily presented by the Principals of the Public Schools in the city of New York, is but a specimen of many others which have been received:—

“The subscribers, being well acquainted with the series of School Books prepared by Miss ROBBINS, are desirous to bring their merits before those interested in popular education.

“Proceeding gradually through a complete course of school tuition, these works are replete with useful information, and are well adapted to improve the moral and mental powers of youth. They bear the impress of a mind thoroughly versed in practical education, knowing the matter which is suitable, and the manner in which it is to be applied to the minds under cultivation. These books have obtained a wide circulation, and the approbation with which they are regarded is commensurate to the use made of them.

“We (the undersigned) hope that such as are interested in selecting books for the use of schools will examine this series, the author of which has devoted her life to this object.”

“The Elementary Reading Books prepared by Miss Robbins, have been in use by the Public Schools of this city for many years. I have thoroughly examined them, and tested them in practice, and am of opinion that they are the best of their kind for the purposes of moral and mental development. The selections in them are from the best writers for juvenile readers, and judiciously adapted to American Schools, wherever the subjects may have required alterations. Her continued

course of School Books are worthy the highest commendation; and, from her matured experience, I have the fullest confidence in Miss Robbins as a writer of School Books. Her Introduction and Popular Lessons are unequalled for the purpose of analytical instruction.

S. W. SETON."

"I have been acquainted with the Popular Lesson Series some time, and have given them my official recommendation for use in the Schools of this State.

IRA MAYHEW,

Superintendent of Public Instruction, Michigan."

"I am well acquainted with the text-books prepared by Miss Robbins, and think highly of their merits. What these merits are, in my opinion, I will briefly state.

They are well written in point of style, showing an acquaintance with the best models of English composition, and free from those inaccuracies and that carelessness which deface so many of our school books.

They are well adapted to the comprehension of the several classes of children for which they are designed. Nothing is offered to the understanding of a child, until it is prepared for its reception.

They convey a great amount of useful knowledge; and are also eminently suggestive in their character. They fill the mind of a child with a healthy love of knowledge, and that lively desire of progress, which it is a great end of education to awaken and preserve.

The moral tone of these books is excellent. They inculcate generous sentiments, and appeal to the highest motives. They direct the admiration of children to those qualities in humanity which are most admirable. They thus afford great aid to the teacher, in the moral training of his pupils.

GEO. S. HILLARD."

"I have seen Miss Robbins' School Books, and some of them I have examined with care. They seem to me to have very great merit. They are written with good taste, and evince a careful and skilful use of extensive reading. They are well adapted to excite the mind to inquiry, and to fill it with useful and interesting knowledge.

Their moral tone is excellent; on this score they are wholly free from objection.

The Committee on Books used in our Public schools (of which I am chairman) have just resolved, by unanimous vote, to recommend the introduction of the Sequel to Popular Lessons; and others of her books are under favorable consideration.

First Lessons in Human Physiology, for the use of Schools, to which are added brief Rules of Health: by JOHN H. GRISCOM, M. D., with 50 large and distinct illustrations. 16mo. 42 cts.

"This work is written with much care by one fully competent, not only in respect of his thorough acquaintance with the subject, but of the faculty or *tact* necessary to secure the attention, by reaching and interesting the minds of children.

It is strictly a *First book* in the study of Human Physiology—a study which in importance is second to none, and superior to most of the subjects which are now taught in our schools.

I am so well acquainted with Dr. Griscom's writings, and with the very sound and practical views he always advances, that I should have no hesitation in commending almost any thing from his pen.

HON. HORACE MANN."

Extract from the Minutes of the Executive Committee of the New York Public School Society, March 4, 1847.

"*Resolved*, That Griscom's small work on Physiology be adopted for general use in the Upper Schools, and that a copy be placed in the Primary Schools for each of the Teachers, Assistants, and Monitors."

"Dr. Griscom's First Lessons in Human Physiology, I consider admirably adapted to the capacity of children, combining in a very happy manner, interest and instruction. I shall most cheerfully recommend its use in all our Primary Schools.

IRA MAYHEW,

Superintendent of Public Instruction, Michigan."

"Griscom's Physiology, I consider a work of rare merit; one which ought to be in the possession of every child in the land, giving, as it does, in a condensed but simple form, much valuable information."

(*Extract from the New Preface.*)

"In presenting to the public an improved edition of the following lectures, the editor has endeavored to render the work as nearly complete as the nature of the subject would permit. With this view, he has extended the critical portion down to the present period, embracing

all those writers in English literature who have adorned the language with their productions during the last half century. The criticisms, though brief, are as extensive as the nature of the work requires, and are written with direct reference to the purposes of instruction," etc.

Baldwin's Table Book. A Table Book and Primary Arithmetic, compiled and arranged for the Introductory Department of the New York Public and Ward Schools, and particularly adapted to the system of Mutual Instruction. By AUSTIN BALDWIN. New edition, revised. 18mo. 10 cts.

Preface.—Having for a long time sustained considerable inconvenience from the want of a book of Arithmetical Tables adapted to the capacities of very young pupils, and arranged in such a manner as to answer the purposes of a large school, I have been induced to compile one, with a special view to the necessities of the system of monitorial instruction.

Believing it important that children should be made to understand the application of what they are required to commit to memory, I have placed a few simple questions at the end of each lesson, illustrating its use; and as a knowledge of the rules of Arithmetic can be well understood by children, only by performing the operations, I have endeavored, in the introduction, to make the rules as concise as possible, depending principally on the examples for fixing them in the minds of the pupils. It is confidently hoped that this little work will lighten the labor of the child in committing to memory that which is so important as a foundation for Arithmetic, and also that, by the division and numbering of the lessons, it may relieve the teacher of much trouble in assigning the proper portions for each scholar or class.

That it may, however small the offering, aid the cause of juvenile education, is the earnest wish of
